
What words and pictures do you have impressions about in our lecture?

Also, please tell us about what you think, don't recognize in detail and want to know more.

- Carnivorous E.coli
- mewtwo (which is Pokemon.)
- synthetic biology
- lighting E.coli
- image picture of iGEM
- At first, I believed that e.coli provide only toxin but finally I was surprised at the possibility of e.coli.
- Be surprised for Bio Bricks
- E.coli will catch and eat with mucilage.

Could you choose a below level which you have an impression or an interest about iGEM

- A (very interesting)
- B
- C
- D
- E (No interesting)
- E (No interesting)

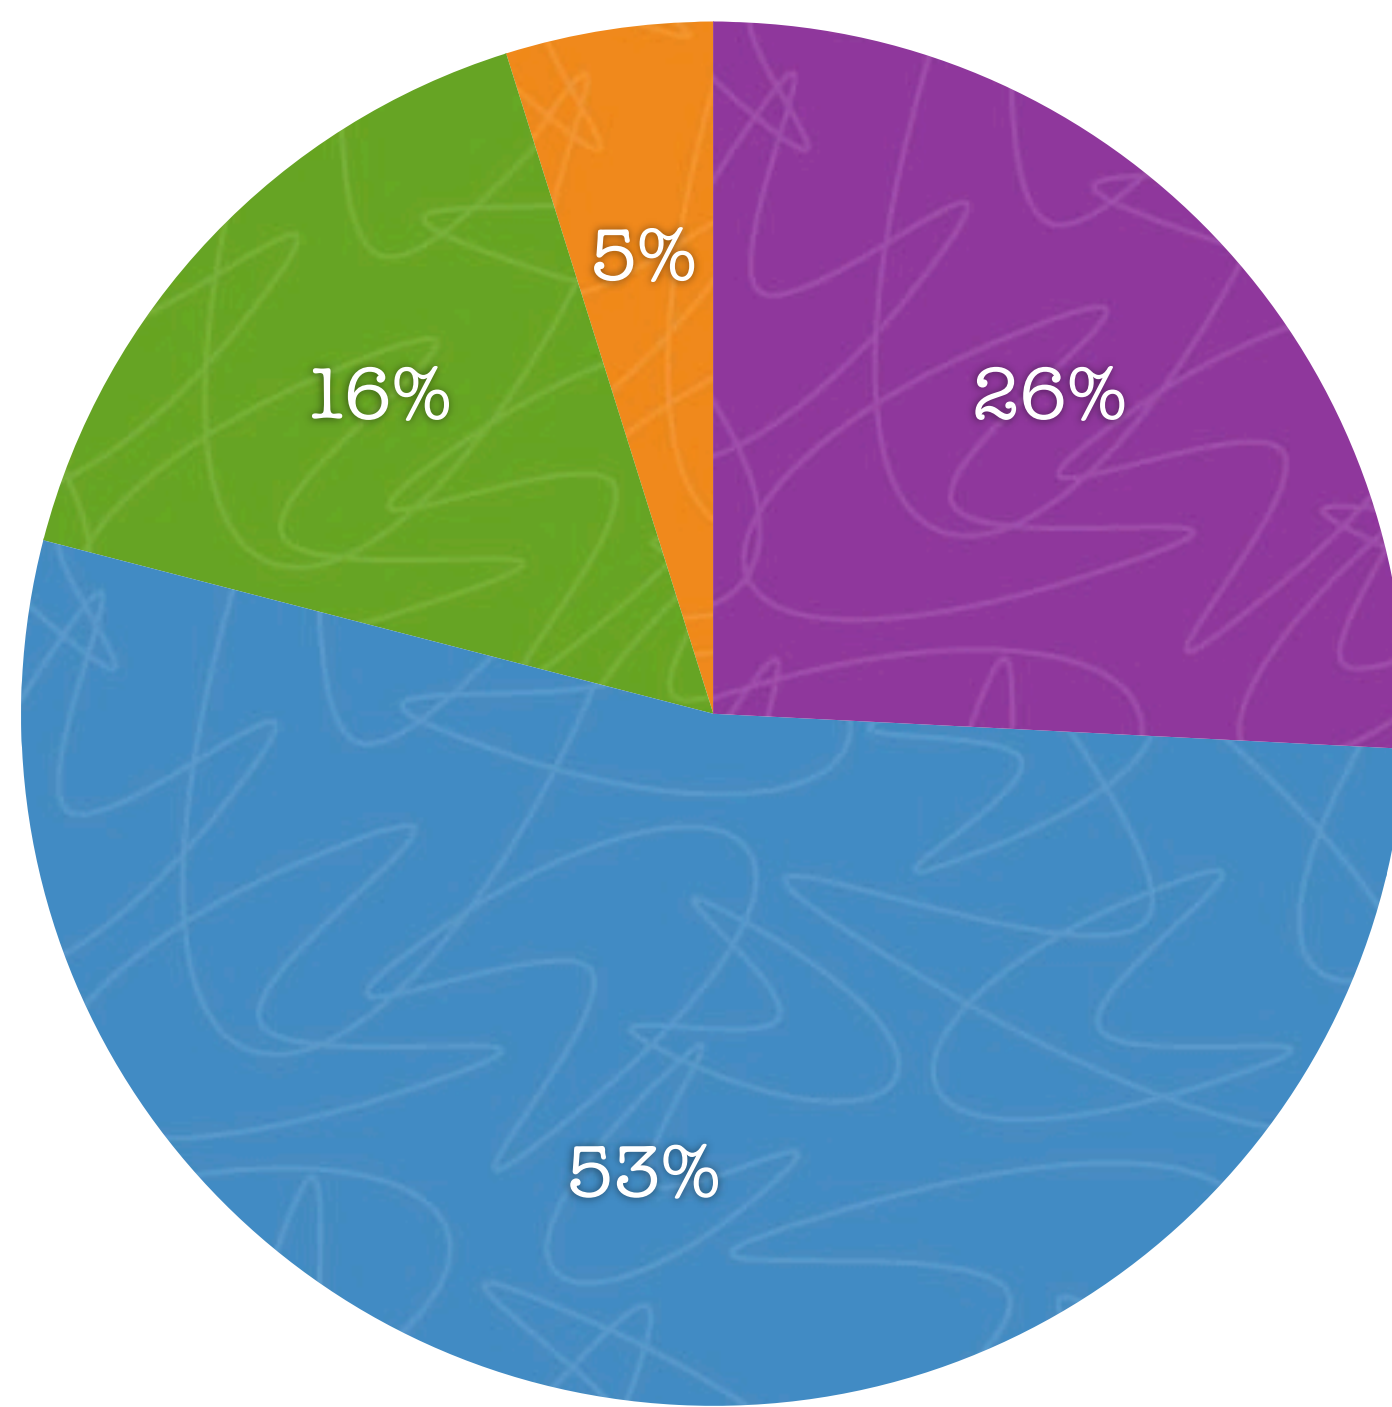

表 1

A (very interesting)	16
B	33
C	10
D	3
E (No interesting)	0

Fig.3 says that one third of students who are not interested in biology at first.

After the lecture, most of students get interested in synthetic biology.

This result means that our lecture works out.

Could you choose a below level which it is difficult for you to understand this lecture.

- A (very hard)
 - B
 - C (so so)
 - D
 - E (very easy)
- タイトル

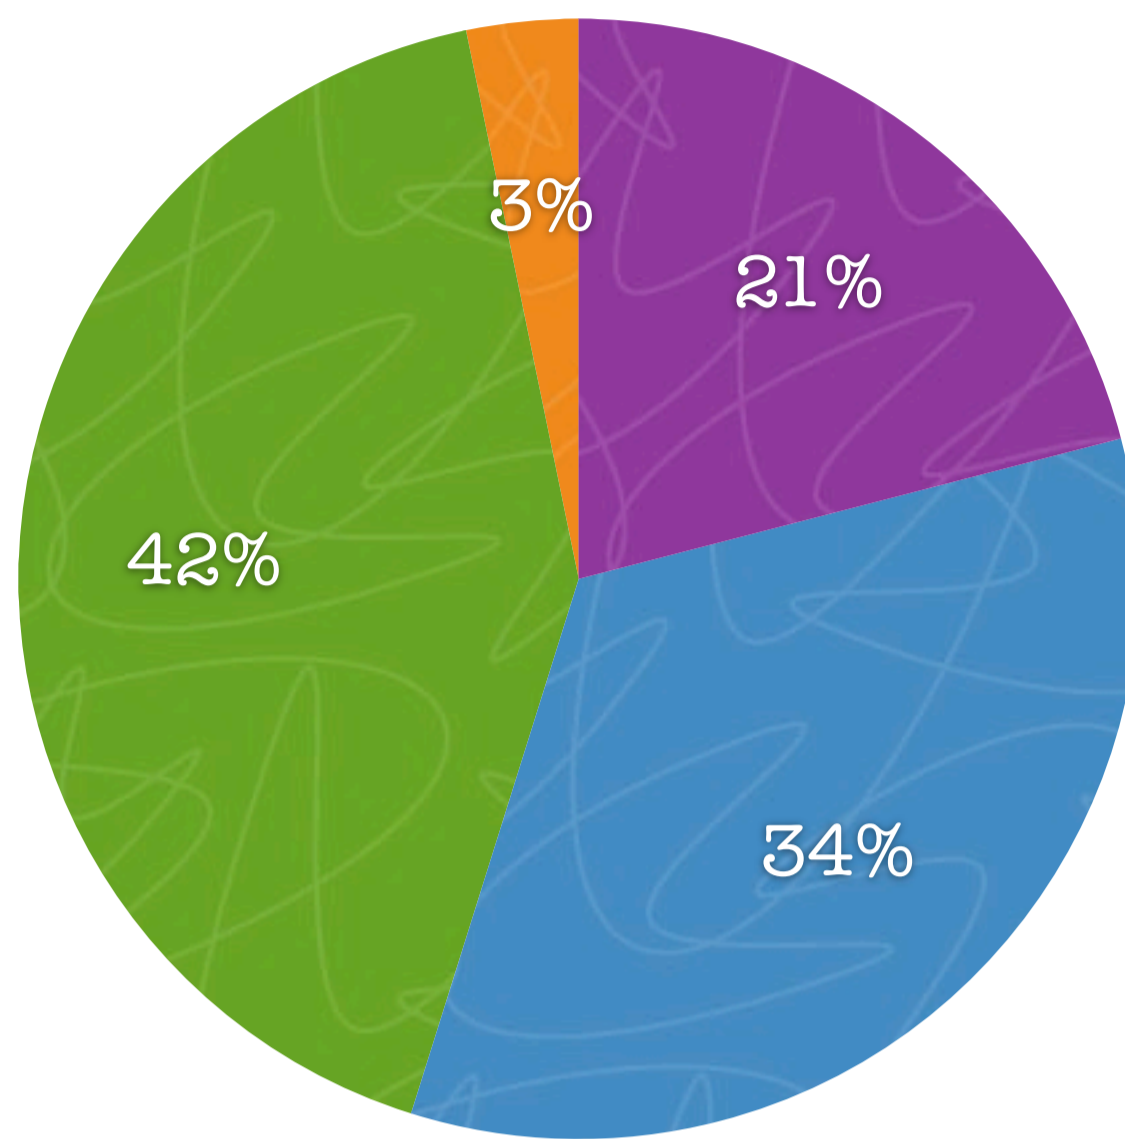

表 1

A (very hard)	13
B	21
C (so so)	26
D	2
E (very easy)	0

According to question.6, there are many students having interests in iGEM, but the majority of them feels our lecture difficult.

This is why we hereafter will try to improve the contents of the lecture in order to make them understand it.
